The last decade has seen a surge of scholarly interest in these religious professionals and a good number of high quality publications. Our volume, however, with its unique intercultural character and its explicit focus on appropriation and contestation of religious expertise in the Imperial Era is substantially different. Unlike the rather narrow focus of earlier studies of civic priests, the papers presented here examine a wider range of religious professionals, their dynamic interaction with established religious authorities and institutions, and their contributions to religious innovation in the ancient Mediterranean world, from the late Hellenistic period through to Late Antiquity, from the City of Rome to mainland Greece, Asia Minor, Syria and Egypt, from Greek civic practice to ancient Judaism. A further advantage of our volume is the wide range of media of transmission taken into account. Our contributors look at both old and new materials, which derive not only from literary sources but also from papyri, inscriptions, and material culture. Above all, this volume assesses critically convenient terminological usage and offers a unique insight into a rich gamut of ancient Mediterranean religious specialists.

Magic has always been a widespread phenomenon in Greek Society, starting from Homer's Circe (the first 'evil witch' in western history) and extending to the pervasive belief in the 'evil eye' in the twenty-first century Greece. Indeed, magic is probably the most ancient and durable among social and religious phenomena known to classical and other scholars, and it can be traced over a span of some three millennia in sources in the Greek language as well as in an impressive range of visual and other media. For instance, curse tablets from fourth-century B.C. Athens, the medico-magical gems of late antiquity, early Christian amulets, and various exorcism prayers from the medieval and later periods. Organised chronologically, the intriguing panorama offered by this book guides the reader through the ancient, medieval, modern and even contemporary periods, highlighting the traditions, ideologies and methods of magic in each period of Greek history. It brings together the latest insights from a range of experts from various disciplines: classicists, art historians, archaeologists, legal historians and social anthropologists amongst others.

There can be no doubt thatJan intelligence of a higher order inspired the author of this volume.JHere is help for layman and scientist alike, to recognize the intricate secrets and mysteries of earth life and to utilize the tremendous powers that develop in the reader, with the understanding of age-old psychic phenomena, its laws and its purpose.
