Offering a resolution of 2560x1600 pixels, the 30-inch display is also a significant step up from the 1920x1200 resolution offered by most 23-inch displays available. It's also perhaps the most aesthetically impressive display Apple have ever produced, and shares a clear design philosophy with the new iMac G5. The iMac and Cinema display models are supplied on a similar stand that allows the display to be tilted up or down between -5 and 25 degrees (where 0 is perpendicular to the desk), ...
