Learn | Inventor | Autodesk Knowledge Network

You can create a derived part using a part, assembly (not in LT), sheet metal part, or weldment. The source is called the base component. A derived assembly (not in LT) component originates from an assembly file and may contain parts, subassemblies, and derived parts. You select geometry to add, subtract, or exclude from the resulting derived component.

To Create a Derived Part or Assembly | Inventor ... - Autodesk

Autodesk Inventor places the inferred iMate on the edge most likely to be useful. If you want the iMate placed on a different edge, delete the inferred iMate and manually create an iMate. Create the profile sketch required to create a feature with a circular edge. Click the icon for Extrude, Revolve, or Hole. Select values and geometry as needed.
