Water is of the prime importance for all the human activities and so its management and conservation is most essential. In this present age, when every man is aware of the importance of sustainable environment, training the mass in environment management is the need of hours. It is necessary to change people s attitude towards the importance of water. A new environmental behaviour is necessary, in which quantitative demands and confrontation must be replaced by qualitative appreciation and co-ordination. This will hopefully lead us into a new era of human harmony, which can bring changes to the well being of life on the earth. The book presents the most important aspects of pollution, conservation and management of aquatic environment. Factual studies and research-based recommendations are also included in this book.
