1994. The stated intent of the California Legislature in enacting the current FSC law is for persons who obtain firearms to have a basic familiarity with those firearms, including, but not limited to, the safe handling and storage of those firearms. The statutory authority for this program is contained in Penal Code sections 26840 and 31610 through 31700. These statutes mandate DOJ to develop, implement and maintain the FSC Program. Pursuant to Penal Code section 26840, a firearms dealer cannot deliver a firearm unless the person receiving the firearm presents a valid FSC, which is obtained by passing a written test on firearm safety. Prior to taking delivery of a firearm from a licensed firearms dealer, the purchaser/recipient must also successfully perform a safe handling demonstration with that firearm..

This study guide provides the basic firearm safety information necessary to pass the test. Following the firearm safety information in this guide will help reduce the potential for accidental deaths and injuries, particularly those involving children, caused by the unsafe handling and storing of firearms. In addition to safety information, this study guide provides a general summary of the state laws that govern the sale and use of firearms. Finally, there is a glossary that defines the more technical terms used in the study guide.

If you choose to have a gun in California, this book could keep you out of jail. Firearm ownership, possession, and use are individual constitutional rights that carry extraordinary responsibilities. Along with your responsibility to know and follow safety procedures, you also have increased responsibility to comply with all applicable state, federal, and local laws. Because of the complexity of these laws, inadvertent gun law violations by well-intentioned

good people are increasingly common. In the politicized legal environment of California "gun-control" laws, the consequences of even an inadvertent violation can be severe. To protect yourself, you need to know the law. This book will help. This book explores, explains, and summarizes the firearm laws affecting firearm owners in California, and warns about common legal "traps" that California firearm owners often unintentionally fall into. When can you use deadly force? Who can possess a gun? When are you permitted to have a gun? Where can you have a gun? How must a gun be possessed? How do you get your gun rights back? Which guns are banned? How do you get your guns back from the police? Can you carry a gun in public? This book answers these questions, and many others. There are over 800 California state statutes regulating the manufacture, distribution, sale, possession, and use of firearms. There are thousands of overlapping federal laws regulating firearms that apply in California. And there are hundreds of administrative regulations, local ordinances, and California Department Justice Firearms Bureau written and unwritten policies that also apply. With all the overlapping regulations, its no wonder that confusion runs rampant among California gun owners, as well as among police, prosecutors, and judges. This book will inform those who are subject to California's complex firearms laws so that they can avoid inadvertently violating them, and will educate those tasked with enforcing those laws so they can avoid mistaken arrests and prosecutions. Written by C.D. "Chuck" Michel, a firearms attorney with 20 years of experience representing the NRA, as well as firearm manufacturers, wholesalers, retailers, and gun owners, California Gun Laws: A Guide to State and Federal Firearm Regulations is an invaluable resource. Michel has been litigating civil and criminal firearm cases since 1991, many of which were high profile and attracted state and national media attention. His clients

HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.
