The Chinese Century is a neologism suggesting that the 21st century will be geopolitically dominated by the People's Republic of China, similar to how "the American Century" refers to the 20th century and "Pax Britannica" refers to the 19th. The phrase is used particularly in the assertion that the economy of China will overtake the economy of the United States as the largest national economy in the world, a position it held in the 16th, 17th century and early 19th century. The Economist has arg

About this series. Since 1978, China's political and social systems have transformed significantly to accommodate the world's largest population and second largest economy. These changes have grown more complex and challenging as China deals with modernization, globalization, and informatization. The unique path of sociopolitical development of China hardly fits within any existing frame of reference.

With about one-fifth of the world ' s entire population, the nation of China remains an enigma to many in the West. Thousands of years ago, China was an imperial nation with grand ambitions of regional—and even world—domination. Though it was racked by war and economic catastrophe throughout the 20th century, the opening decades of the 21st century are seeing new attention paid to China as an economic and political superpower in the making.
