The Dutch anthropologist Geert Hofstede is recognized as a pioneer in the fields of international management and social psychology - and his work is a perfect example of the ways in which interpretative skills can help solve problems and provide the foundation for strong thinking and understanding both in business and beyond. Hofstede's central achievement was setting up an efficient interpretative framework for understanding the cultural differences between one country and another. Working for the international computing company IBM in the late 1960s, Hofstede noted that such cultural differences had huge consequences for international organizations. Up until then, while many inside and outside of business recognized the importance of these differences, little had been done to define precisely what cultural difference was and in what areas of life it was expressed. Hofstede's insight was that if one could interpret and define the dimensions of cultural difference, it would be possible to measure them and act

accordingly. From a vast survey of IBM's employees in several countries, Hofstede originally defined five dimensions of culture: every society could be rated for each dimension, providing a useful guide to the kinds of cultural differences at play. As ever, good interpretative skills provided the basis for better understanding.

A masterpiece in intercultural training! Exploring Culture brings Geert Hofstede's five dimensions of national culture to life. Gert Jan Hofstede and his co-authors Paul Pedersen and Geert Hofstede introduce synthetic cultures, the ten "pure" cultural types derived from the extremes of the five dimensions. The result is a playful book of practice that is firmly rooted in theory. Part light, part serious, but always thought-provoking, this unique book approaches training through the three-part process of building awareness, knowledge, and skills. It leads the reader through the first two components with more than 75 activities, dialogues, stories, and incidents. The Synthetic Culture Laboratory and two full simulations fulfill the skill-building component. Exploring Culture is suitable for students, trainers, coaches and educators. It can be used for individual study or as a text, and it serves as an excellent partner to Geert Hofstede's popular Cultures and Organizations.

Hofstede introduced a culture paradigm that has been widely influential in international business. However, its relevance in light of culture's increasing complexity due to globalization has been questioned. Alternative culture frameworks and perspectives are offered by leading scholars in global marketing and management.

Masculinity and Femininity is the first in-depth discussion of the masculinity dimension, and how it can help us to understand differences amongst cultures. Geert Hofstede begins with a general explanation of the masculinity dimension, and discusses how it illuminates broad features of different cultures. Parts Two, Three and Four apply the dimension more specifically to gender (and gender identity), sexuality (and sexual behaviour), and religion, probably the most influential variable of all. The book closes with a synthesizing statement about cultural values as they are linked to sexuality, gender and religion.

Geert Hofstede has completely rewritten, revised and updated Culture's Consequences for the twenty-first century, he has broadened the book's cross-disciplinary appeal, expanded the coverage of countries examined

from 40 to more than 50, reformulated his arguments and a large amount of new literature has been included. The book is structured around five major dimensions: power distance; uncertainty avoidance; individualism versus collectivism; masculinity versus femininity; and long term versus short-term orientation.

Cross-Cultural Analysis is the sequel to Culture's Consequences, the classic work published by one of the most influential management thinkers in today's times, Geert Hofstede.
