Re: Can I check a computer's hardware/specs thru Dell with a Service Tag #?

Solved: Can I check a computer's hardware/specs thru Dell ...

RE: Getting Dell Device Specs from Service Tag. Service tags do not list specs. The Original Configuration is a bunch of unrecognizable code numbers. Check your computer tag on the support page and look at components to see the list. You are better off looking at the model name and number on Google. 0 Kudos.

Dell uses the service tag to check for device info such as specification and warranty status. Finding the service tag is not hard. The Dell service tags are all unique so you will need to give the technical folks the correct one. This is important because the service tag identifies your computer and the hardware your computer shipped with. When ever your computer has problems, you need to have the service tag as customer service will request for it.
