Hino's research and development in engines and components is world class, and the results show: Hino engines are among the highest rated for longevity on the market. That means lower costs for operation. Unique to Hino's engine design is their low requirement for oil - up to 26% less than other OEM'S!

*HINO TRUCK PARTS*

I know the manuel recommends a continuous rpm of 2800 on my 1990 3888 but that nets me around 15-16 knots and about 15 gph, Boat is fulley equiped and weighs in at over 24,000 lbs with cocpit extension and lots of canvass etc. I was wondering how much more efficient the EH700 175 hp would be at 2300 rpm, which yields about 10.5-11 knots.
