The 2nd Edition of the book "General Science for RRB Junior Engineer, ALP, NTPC & Group D Exams" contains specific topics in Science, as per the notified syllabus & questions asked in the various Railway Exams. The book contains to the point theory followed by an exercise with solutions. The book has been thoroughly updated and now covers 500+ questions from the recent past papers of various RRB exams. The book contains, in all, 2500+ MCQs.

This book fills a unique position in the literature as a dedicated mechanical shock analysis book. Because shock events can be extremely damaging, mechanical shock is an important topic for engineers to understand. This book provides the reader with the tools needed to quantitatively describe shock environments and their damage potential on aerospace, civil, naval and mechanical systems. The authors include the relevant history of how shock testing and analysis came to its current state and a discussion of the different types of shock environments typically experienced by systems. Development of single-degree-of-freedom theory and the theory of the shock response spectra are covered, consistent with treatment of shock spectra theory in the literature. What is unique is the expansion to other types of spectra including less common types of shock spectra and energy spectra methods using fundamental principles of structural dynamics. In addition, non-spectral methods are discussed with their applications. Non-spectral methods are almost completely absent from the current books on mechanical shock. Multi-degree-of-freedom shock spectra and multi-degree-of-freedom testing are discussed and the theory is developed. Addressing an emerging field for laboratory shock testing, the authors bring together information currently available only in journals and conference publications. The volume is ideal for engineers, structural designers, and structural materials fabricators needing a foundation to practically analyze shock environments and understand their role in structural design.

Engineering Science is a comprehensive textbook suitable for all vocational and pre-degree courses. Taking a generic approach, the essential scientific principles engineering students need for their studies are presented topic by topic. Unlike the majority of texts available on this subject, Bill Bolton goes beyond the core science to include the mechanical, electrical and electronic principles needed in the majority of courses. A concise and accessible text is supported by numerous worked examples and problems, with a complete Answer Section at the back of the book. Now in its fifth edition, the text has been fully updated in line with the current BTEC National syllabus and includes a grid mapping the chapters to the BTEC units. The breadth of coverage means this fifth edition will also prove an essential reference for students embarking on HNC and Foundation Degrees, who require a general introduction to this subject area. New for this edition is online lecturer support available from <http://textbooks.elsevier.com> and featuring:

- Key points, definitions and equations from the book for use as handouts
- Multiple Choice Questions
- Answers to the Multiple Choice Questions
- PowerPoint slides featuring essential illustrations per topic area for use in lectures or as handouts

SSC Junior Engineer Electrical Engineering Recruitment Exam Guide 4th Edition is a comprehensive book for those who aspire to excel in SSC Paper 1 and Paper 2 for Jr. Engineer - Electrical post. The book has been updated with the SSC Junior Engineer 2017 (2 Sets), 2016, 2015 & 2014 Solved Papers. The book has been divided into three sections namely Electrical Engineering, General Intelligence & Reasoning and General Awareness, each sub-divided into ample number of solved problems designed on the lines of questions asked in the exam. All the chapters contain detailed theory along with solved examples. Exhaustive question bank at the end of each chapter is provided in the form of Exercise. Solutions to the Exercise have been provided at the end of each chapter. Another unique feature of the book is the division of its General Awareness section into separate chapters on History, Geography, Polity, Economy, General Science, Miscellaneous topics and Current Affairs.
