The Evolution engine (popularly known as Evo) is an air-cooled, 45-degree, V-twin engine manufactured from 1984 by Harley-Davidson for the company's motorcycles.

Harley-Davidson Evolution engine—Wikipedia

The Evolution (Evo) engine is a V-twin engine that has been manufactured by Harley-Davidson since 1984 for a variety of different motorcycle models. The engine design is often credited with saving Harley-Davidson from bankruptcy after the management buyout and subsequent reorganization that the company went through during the early 1980s.

Harley Evo Engine For Sale—New, Rebuilt & Used

The small Evolution engine permanently replaced the Ironhead engine, and as of November 2010, is still being produced by the Harley-Davidson motorcycle company. It can be found in Harley-Davidson's 883, 1100 and 1200 XLH Sportster models. The larger Evolution engine, however, was replaced by the Twin Cam 88 engine in 1999.
