My name is Nora Black, and I'm fifty-one-years young. At least that's what I tell myself, when I'm not having hot flashes, my knees don't hurt, and I can find my reading glasses. I'm also the proud owner of a salon called Scents & Scentsability in the small resort town of Garden Cove, where I make a cozy living selling handmade bath and beauty products. All in all,

my life is pretty good. Except for one little glitch... Since my recent hysterectomy, where I died on the operating table, I've been experiencing what some might call paranormal activity. No, I don't see dead people, but quite suddenly I'm triggered by scents that, in their wake, leave behind these vividly intense memories. Sometimes they're unfocused and hazy, but there's no doubt, they are very, very real. Know what else? They're not my memories. It seems I've lost a uterus and gained a psychic gift. When my best friend's abusive boyfriend ends up dead after a fire, and she becomes the prime suspect, I end up a babysitter to her two teenagers while she's locked up in the clink. Add to that the handsome detective determined to stand in my way, my super sniffer's newly acquired abilities and a rash of memories connected to the real criminal, and I find myself in a race to catch a killer before my best friend is tried for murder.

electrical and electronics systems. It begins with simple circuits and finishes with complex electronic systems that include engine management, transmission control and stability control systems. If you want to diagnose a simple alternator charging or headlight problem, this book is for you. But if you also want to fix complex electronic systems using On-Board Diagnostics, a multimeter or oscilloscope, this book also shows you how to do that. Is it best to use a series or parallel circuit when adding a horn? How do you use a multimeter to check a coolant temperature sensor against its specs? How can you add an electronic timer that will keep your headlights on as you walk to your door? When should you buy an oscilloscope and how complex an instrument do you really need? The author has been writing about car electronic systems for over 25 years. He is also an experienced and proficient car modifier who has performed numerous electronic modifications and upgrades to his own cars, including world-first modifications. If you want a practical, hands-on book that demystifies and explains car electrical and electronic systems, this is the book for you.
