Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular `Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book ? acclaimed for being the first social history to document and understand India's new entrepreneurial groups ? Harish Damodaran looks to answer who the new `wealth creators' are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

Egypt has one of the oldest and most productive agricultural systems in world, yet it has become one of the world's largest food importers. Today, as the Egyptian government undertakes a major agricultural reform program, the lessons of its past practices and current development need to be shared with the rest of the world. This text--written by Egyptian agricultural experts and other specialists--provides a comprehensive introduction and reference to Egypt's agricultural practices from their earliest origins through the 1990s. Topics range from the country's environmental history, to shifting population dynamics, to changing governmental and economic structures. Detailed descriptions of agricultural production and development in the northern Littoral region, the Delta, middle and upper Egypt, and the deserts are also provided. Written for agronomists, historians of the Middle East, and students and policy makers specializing in third-world development and agricultural systems, this work is an indispensable guide to the region's agricultural history and conventions.
