After her father sentences two members of The Briscoe Boys gang to death, Judge Tremaine feels he has no choice but to send Lynne to Denver City along the Oregon Trail to live with her Uncle George...against her will. For Lynne, the only thing worse than being sent away to the wild west is making the journey with the handsome, arrogant, wicked man her uncle has hired to escort her. Especially when the anger she feels toward him begins to turn to something hotter. Cade Lawson is determined to prove himself to his employer, George Tremaine, after letting him down months earlier. But what he thought would be his second chance may, in fact, be a harsh punishment for his past mistakes. Lynne is headstrong, fiery, and determined to show him she is fearless. She is also beautiful and tempting, and when Cade sees just how afraid she really is underneath her brave act, he may be in danger of losing his heart to her forever. When her would-be killer attacks, it's all he can do to keep Lynne safe. He swore to protect her, but who will protect him from her?

Society columnist Nora Blackbird is thrust into the world of celebrity tabloid gossip when a billionaire buys the farm... Nora's assigned to write a profile on billionaire fashion designer Swain Starr, who recently retired to build a high-tech organic farm with his new wife, Zephyr, a former supermodel. But before Nora can get the

story, the mogul is murdered. And now her boss wants her to snap up an exclusive on who killed Starr before the cops do. But solving this murder won't be easy with a family as colorful as Nora's. Mick, her sort-of husband, is associating with unsavory characters from his past. Her sister Libby is transforming into a stage mom for her diabolical twins. And Emma, the youngest Blackbird, is mysteriously kicked out of the house by Mick. Nora's home life may be hogging the spotlight, but there's also a matter of Starr's missing pig, which just might be the key to solving this mystery and the way Nora can bring home the bacon...

If you are a robot enthusiast who wants to quickly get the most out of Lego Mindstorms EV3, this is the book for you. Prior programming experience is useful to get the most out of this book, but not necessary.

Indulge in your favorite hue (or two!) with fabric designer Jessica Levitt. Bright and bold quilt blocks pair same-color prints with strong solids for depth and lots of personality. Stitch random-width strips to a muslin base for a planned approach to improv. Giant-size blocks join together like a fun puzzle, forming a graphic secondary pattern when you piece the quilt top!

Jason is an Open Source interpreter for an extended version of AgentSpeak – a logic-

based agent-oriented programming language – written in Java™. It enables users to build complex multi-agent systems that are capable of operating in environments previously considered too unpredictable for computers to handle. Jason is easily customisable and is suitable for the implementation of reactive planning systems according to the Belief-Desire-Intention (BDI) architecture.

Programming Multi-Agent Systems in AgentSpeak using Jason provides a brief introduction to multi-agent systems and the BDI agent architecture on which AgentSpeak is based.

The authors explain Jason's AgentSpeak variant and provide a comprehensive, practical guide to using Jason to program multi-agent systems. Some of the examples include diagrams generated using an agent-oriented software engineering methodology particularly suited for implementation using BDI-based programming languages. The authors also give guidance on good programming style with AgentSpeak. Programming Multi-Agent Systems in AgentSpeak using Jason Describes and explains in detail the AgentSpeak extension interpreted by Jason and shows how to create multi-agent systems using the Jason platform. Reinforces learning with examples, problems, and illustrations. Includes two case studies which demonstrate the use of Jason in practice. Features an accompanying website that provides further learning resources including sample code, exercises, and slides This essential guide to AgentSpeak

and Jason will be invaluable to senior undergraduate and postgraduate students studying multi-agent systems. The book will also be of interest to software engineers, designers, developers, and programmers interested in multi-agent systems.

Hidden in the mountains of East Tennessee, an eleven-year old goes about the business of being a boy during the summer of 1970. Within a balance of terror and innocence, he bears silent witness to ghosts of the dead and the cruelties of a teenage killer while local justice plays out in a community carved from legacies of coal mining and religion.

For the Vampire community, the Solstice Choosing has been the holiest night of the year - for a hundred thousand years. But this year, something new is about to happen. The oldest prophecies are about to be fulfilled - and the Festival of Blessings is finally upon us.

A collection of engaging and thought-provoking essays looking at the world of business and management during a recession. Furnham takes a sideways look at some business issues that are often brushed under the carpet and examines recent academic contributions to business literature in an amusing and jargon-free style.
