Right- J Overview : ACCA Manual J Load Calculation - YouTube

A Manual J is the exercise of calculating the size of the heating and cooling equipment in more details than just sq. ft. It takes into account how tight a home is, insulation of walls, floors, attic, window sizes and quantity, sun light, local weather, altitude, humidity and much more. Manual J is for residential properties.

Heat LOAD USA - Manual J, Load Calculation HVAC DESIGN BASICSMANUAL J Calculation Reports. A Manual J calculation performed with Wrightsoft Right J begins with drawing your home room-by-room, and entering all pertinent info such as insulation factors, windows, ceiling heights, fireplaces, etc. Then the designer separates the home into different systems and zones, if the residence requires multiple zones, or multiple systems, as the residence in our example page does.
