IMPLEMENTATION IN SOFTWARE The 'Cambridge Materials Selector' (CMS) is a computer package consisting of a data base of material properties, a management system which recovers and manipulates the data, and a graphical user interface which presents the property data as material selection charts.

MATERIALS SELECTION IN MECHANICAL DESIGN

If the CES EDU Materials Selection software is available the same exercises can be solved by its use. This involves first creating the chart, then applying the appropriate box or line selection. The results, at Level 1 or 2, are the same as those read from the hard copy charts (which were made using the Level 2 database).
