The 2nd edition of Catheter Ablation of Cardiac Arrhythmias, written by Shoei K. Stephen Huang, MD and Mark A. Wood, MD, provides you with the most comprehensive and detailed coverage of the latest ablation techniques, from direct-current to radiofrequency to cryoenergy. It offers the latest information on anatomy, diagnostic criteria, differential diagnosis, mapping, and the use of echocardiography to assist in accurate diagnosis and management of cardiac arrhythmias. Authored by two of the world ' s leading experts in catheter ablation, this text includes a unique section on troubleshooting difficult cases, and its use of tables, full-color illustrations, and high-quality figures is unmatched among publications in the field. Get the most comprehensive and detailed coverage of arrhythmias and ablation technologies, highlighted by a systematic approach to troubleshooting specific problems encountered in the laboratory – complete with solutions. Find the critical answers you need quickly and easily thanks to a consistent, highly user-friendly chapter format. Master each approach with exceptional visual guidance from tables, illustrations, high-quality figures. Review basic concepts and build clinical knowledge using extensive tables that present specific "hard-to-remember" numerical information used in diagnosis, and mapping to summarize key information in each chapter. Improve accuracy with assistance from advanced catheter mapping and navigation systems and use of intracardiac echocardiography to assist accurate diagnosis and ablation. Keep pace with an updated and expanded section on atrial fibrillation. Stay current on timely topics like contemporary cardiac mapping and imaging techniques, atrial tachycardia and flutter, atrial fibrillation, atrioventricular nodal reentrant tachycardia, tachycardias related to accessory atrioventricular connections, and ventricular tachycardia, transeptal catheterization, ablation for pediatric patients, and patient safety and complications.

Cardiac Arrhythmias: Advances in Research and Treatment: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Cardiac Arrhythmias. The editors have built Cardiac Arrhythmias: Advances in Research and Treatment: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Cardiac Arrhythmias in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Cardiac Arrhythmias: Advances in Research and Treatment: 2011 Edition has been produced by the world ' s leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

This Manual provides the most up-to-date restatement of existing international law applicable to the conduct of air and missile warfare.

This User ' s Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User ' s Guide was created by researchers affiliated with AHRQ ' s Effective Health Care Program, particularly those who participated in AHRQ ' s DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.
