probability that the
final hit was by 1
when shoots first.

Conditioning on the
outcome of the first
shot gives. $f_1 = p_1 P_2 + q_1 f_2$ and $f_2 = p_2 P_1 + q_2 f_1$.

Solving these
equations gives. $f_1 = \frac{p_1 P_2 + q_1 p_2}{P_1 - q_1 q_2}$ (d)
and (e) Let B denote
the event that both

Introduction To Probability Models Probability 2nd Edition Problem Solutions

Solution to Problem
1.8. Let p_i be the
probability of
winning against the
opponent played in
the i th turn. Then,
you will win the
tournament if you

Access Free Solution Manual

win against the 2nd player (probability p_2) and also you win against at least one of the two other players

[probability $p_1 + (1 - p_1)p_3 = p_1 + p_3 - p_1p_3$].

Thus, the probability of winning the tournament is $p_2(p_1 + p_3 - p_1p_3)$.
