There's Lead in Your Lipstick is an absolutely fascinating, eye opening, educated look at every type product we use to clean, buff, touch up and make up our bodies. Toxic ingredients and ingredients to look out for are described in depth. Many words used on labels and in advertising aren't necessarily what we think. Natural does not equal organic.

There's Lead in Your Lipstick: Toxins In Our Everyday Body ...

Yes, you heard it right, lead poisoning. Recent research has revealed that high end drugstore brands use lead in lipstick. Lead itself is a scary word. It is the kind of metal which is used for construction purposes and the idea of lead in lipstick is greatly unsettling to me. Lead poisoning can have serious health implication for adults and it is even worse for children. Lead is not added to the lipstick as an ingredient.

Is There Lead In Lipstick? Is It Dangerous For Your Health?

But I picked up a copy of There's Lead in Your Lipstick by Gillian Deacon and realized I really hadn't given much thought to all the personal care products I use. Gill Deacon was reading Stacy Malkan's 'Not Just a Pretty Face: The Ugly Side of Beauty' while waiting to have an ultrasound to help diagnose her possible breast cancer. It is in Chapt

There's Lead in Your Lipstick: Toxins in Our Everyday Body ...

You won't see lead listed on the label but doesn't mean that there is no lead in the product. Certainly there is no lead added on purpose, but the presence of trace amounts is very difficult to avoid. That's because lead compounds are widely present in minerals and ores from which a number of chemicals used as ingredients in cosmetics are produced. Certain colorants used in lipstick do contain tiny amounts of lead because it is virtually impossible to eliminate all contaminants.
